Work Experience

Actually

Give up a comfortable job in justice to get out of your comfort zone and a new challenge was raised, that of programming, the learning path applied was the following HTML, CSS, Javascript, NodeJS, MongoDB, SQL, React, NextJS and Solidity. I believe that blockchain technology and Mobile is the future, so I focused on learning how to develop with Solidity and React Native.

Trading & Ecommerce

I have done dropshipping while working in the justice system, it consists of contacting a manufacturer or supplier, buying a part of their stock and they make the shipments according to your sales. On the other hand I studied trading and got very good results with technical analysis

Criminal Justice

I fulfilled the position of official 1st Judicial Power in the Court of Guarantees 3 of Lanús from 2018 to October 2020, in the I informed and attended the public through different channels guaranteeing their satisfaction, dispatch of causes. Teamwork and extensive dealings with people with all kinds of problems, being able to further develop my soft skills

Justice of the peace

I informed and assisted the public through different channels, guaranteeing their satisfaction, dispatching cases with the issue of family violence within Law 12,569. Extensive group work. and extensive dealings with people with family problems which helped me to extensively develop my soft skills

About

After dedicating many years of my life to law, I decided to leave it and start programming. I graduated as music producer at licensed school of Ableton Live. I love sports, I play football and training calisthenics. On the other hand I love music, I play piano and guitar, I produce Mixes with Ableton Live. I love travel too and this is why I also decided to start programming, and today I am building the projects I dreamed of as child.

3 mobile applications that are not available for public.
